[ad#] The first version of AutoCAD was available for the Apple II personal computer. Within a few years, the application had been ported to the IBM PC and MS-DOS platforms. Originally a desktop application, AutoCAD was first released in 1982 for the Apple II, then IBM PC/MS-DOS and Apple Macintosh. AutoCAD running on a Macintosh is capable of displaying graphics objects at a native resolution of 4096x2048 dots (approximately 17x7 in) on the Apple Macintosh monitor, but no graphics hardware acceleration is available. Microsoft Windows does not support high resolution graphics. [ad#2] AutoCAD has been ported to other

platforms including the Atari 8-bit family, C64, and Atari ST (called X and X/Xe in later versions) although most of the original functionality did not make it to these platforms. An early release of AutoCAD for the Atari 8-bit family supported objects at only 640x480, but the game and graphics engine used by AutoCAD in its early versions was originally written for the Atari ST platform. In later versions, the Atari graphics engine was modified for use on the Apple Macintosh, as well as providing the basis for the later versions of AutoCAD for MS-DOS and the IBM PC. [ad#3] In 1985, Microsoft purchased Autodesk and AutoCAD. It then became an integral part of Windows, and was part of Windows XP. AutoCAD 2005 was released on Windows XP

and Windows Vista, and AutoCAD 2010 and AutoCAD LT 2010 are now available on Windows 7, Windows 8 and Windows 8.1. In 2011, the software was released for Windows 7 in the form of a new Windows Runtime app. AutoCAD 2013 was released in late 2012 for Windows 8.1. Autodesk, Inc. released the first non-Windows version of AutoCAD, AutoCAD LT, for Mac OS X in November 2013. An AutoCAD LT license is required to use AutoCAD on a Mac, however the installation and file transfer to the Mac are very similar to those found with the Windows version. It is possible to use AutoCAD on mobile and web platforms. A web-based version of AutoCAD is available to web visitors. AutoCAD Mobile is a mobile app for

iOS devices that is pre-loaded with AutoCAD 2010 and AutoCAD LT 2010.
