Roblox is an online game platform and game creation system developed by Roblox Corporation that allows users to program games and play games created by other users. Created by David Baszucki and Erik Cassel in 2004 and released in 2006, the platform hosts user-created games of multiple genres coded in the programming language Lua. For most of Roblox's history, it was relatively small, both as a platform and a company. Roblox began to grow rapidly in the second half of the 2010s, and this growth has been accelerated by the COVID-19 pandemic. Roblox is free to play, with in-game purchases available through a virtual currency called Robux. As of August 2020, Roblox had over 164 million monthly active users, including more than half of all American children under 16. Although Roblox has received generally

positive reviews from critics, it has faced criticism for its moderation, microtransactions, and exploitative practices directed toward children. Roblox is an online gaming platform for children. Games can be created and played via Roblox's website and apps. Users can chat and communicate with each other in special chat rooms, called "Worlds", and create and collaborate on user-created content in a cloud-based platform called "Blocks". The site is free-to-play, and in-game purchases are made with Robux, a premium currency the player can earn by completing offers. Roblox debuted in 2006, and has since become one of the most prominent game hosting platforms for children, and the most popular such service for children under the age of 16. As of 2020, over 80% of registered users on Roblox are under the age of 13, and about half of them are under 8. Roblox had 131 million monthly active users in

August 2018, around 50% of whom played games on mobile devices. The company was founded by David Baszucki and Erik Cassel, who were both released from school to work full-time on Roblox. They were both recognized as "teens to watch" by Time magazine and The Wall Street Journal, and their efforts to market Roblox to children resulted in their inclusion on TIME's list of the 100 Most Influential People in the World. Roblox had created a business plan where they would provide a central base for people to publish games online with a focus on accessibility and simplicity. Roblox reached about 40,000 users by early 2009, and had
